PROFESSIONAL SUMMARY

Computer Science undergraduate with strong foundations in DSA, Operating Systems, DBMS, and scalable software systems. Built systems-oriented projects involving search architectures, scheduling analytics, indexing systems, and AI-integrated software solutions using C++ and Python. Solved 500+ DSA problems across graphs, DP, trees, hashing, and recursion.

TECHNICAL SKILLS

Languages: Python, C++, C, SQL

Core CS: DSA, OOP, Operating Systems, DBMS, System Design

Backend & Systems: Indexing Systems, Scheduling Systems, Caching Systems

Web: HTML, CSS, JavaScript, Bootstrap, Flask

AI & Cybersecurity: Gemini API, Prompt Engineering, Bash Scripting, Nmap, Wireshark

Tools: Git, GitHub, Linux Terminal, VS Code

EXPERIENCE

Cybersecurity Intern — CynbitT Technologies

Jun 2025 – Jul 2025

- Built a Python-based security monitoring system for forensic logging across 3 simulated environments
- Implemented automated timestamped logging workflows reducing manual audit effort by 40%
- Researched 5+ detection techniques and ethical implications related to keylogging systems

Front-End Intern — Kistechno Software

Jul 2024 – Aug 2024

- Developed responsive web interfaces with dynamic filtering and cross-device compatibility
- Improved UI consistency through responsive design refinements and cross-browser testing

PROJECTS

AI-Powered Scheduling Analytics Simulator — Python, Flask, Gemini API

- Developed a scheduling analytics simulator implementing FIFO, SJF, Priority, and Round Robin algorithms with dynamic Gantt chart visualization
- Simulated and analyzed 100+ process scheduling scenarios using waiting time, turnaround time, and response time metrics
- Integrated Gemini AI-based workload analysis generating intelligent scheduling recommendations and performance insights

Search Engine — C++, Python, Indexing Systems

- Built a search engine indexing 10,000+ text entries using inverted indexing for optimized low-latency document retrieval
- Designed efficient indexing pipelines using hashing and string-processing techniques improving lookup efficiency
- Implemented scalable keyword ranking and filtering mechanisms for efficient text-based querying workflows

EDUCATION

Swami Keshavanand Institute of Technology

Jaipur, India

B.Tech in Computer Science and Engineering

2023 – Present

CGPA: 8.97 / 10.0

Kendriya Vidyalaya No. 5

Jaipur, India

CBSE Class 12

2023

Score: 84.67%

ACHIEVEMENTS

- Solved 500+ DSA problems on LeetCode across graphs, DP, trees, hashing, stacks, and recursion
- Maintained a CGPA of 8.97/10.0 in B.Tech CSE with strong performance in core CS subjects
